# MARKETS-FINANCE-COMMERCE

The company has not quite earned its \$1.50 at share dividend in the last two years, but it has diverted part of the net earnings to betterments, the exact amount being \$27,000, which will be refunded to the company by sale of bonds. Parties connected with the manipulation and speculation in Washington Gas at this time have been prominent in similar operations from time to time, with varying success. Also prominent in the movement that influenced the directors of the corporation from the to time, with varying success. Also prominent in the movement that influenced the directors of the corporation to decide to retire the 5 per cent bonds for 5 per cent issue. At the same time extra dividends were cut off and the rate made 5 per cent on an estimated valuation of \$12,000,000.

It was in writing his description of the unanimity of action of the shareholders in approxing and votting for the increased dividend that induced present how well as the country of the washington Gas Company," &c.

sioner G. 1. Naked greed stalked through the meeting of the shareholders of the Washington Gas Company." &c.

One of the finmers.

One of the finmers.

One of the rumors circulating on the street was to the effect that the Washington Gas Company. Interest of the present of the street was to the effect that the Washington Gas Company in trease and to pay 5 per cent or 8 a chare, divided on the beat of the present of 8 a chare, divided on the steek becedier, an increase that one of the steek becedier, an increase that these days of scarce motey and hish yield on all investments.

For many years effort after effort has been made to increase the capitalization of the Washington Gas Company—legitimate efforts, for no corporation can lay mains over and supply the wants of a city like Washington Gas Company—legitimate efforts, for no corporation can lay mains over and supply the wants of a city like Washington in 1913 on the capitalization as chartered by Congress in 1848. And yet Congress has nipped in the bod svery attempt to increase the capitalization—yielded the power to the District Supreme Court for a time, then, so jealous of the action, withdrew it.

There is no more reason to believe that Cougress would permit of making the capital III.000,000 loady than it would in the years that have passed.

Moreover, there is a utility commission in Washington Gas was selling at 184 a share, so that in the last sixteen days, counting Sundays, the price has advanced 514. To this should be added 1.3, the dividend for which the books closed on the lith inst.

The rise from 50 to 356 yesterday was plainly manipulation, plainly speculation, and when all selling orders were exhausted, the price was raised to 356 bid, with 100 shares offered at 190.

Manipulation and speculation are legitimate enough; there are no laws against it. Gas has been speculation are legitimate enough: there are no laws against it. Gas has been speculation are legitimate enough: there are no laws against it.

### Heaviest Sale of Gas.

Havierst Sale of Gas.

Testerday's transactions totaled 4,360 shares, the largest record on the jocal exchange in years, and the heaviest sales of Gas. The price rose from \$90 to 50%, with apparently liberal sales; then at 500-12 to 581 with 72 shares traded in, to 522 with mothing between. From \$25 to 582 was accomplished with a sale of 22 shares, to 583 with 25 shares, and to 0.00 on one sale of 2,000 shares, the broker, Thomas L. Hume, simply making a record of this transaction, being both the buyer and seller.

This sale was reported to be the 2,000 shares of slock upon which Mr. Letter made a loan a year or more ago of about \$80.50 a share to Thomas L. Hume, on which he recently demanded repayment, the suit in the case, Letter vs. Hume, being now on trial, testimony being taken before a master.

There were rumors on the street of a settlement of this case, but no later than Wednesday an official of the Washington Gas Company was on the witness stand in the matter at issue. It has been a great manipulation, with the most sensational part of it yester-day; there is no short interest, no one-squeezed, nothing so far as can be discovered or accertained coming to warrant the advance, save that the Washington Gas Company is a good investment corporation.

It may be that the parties their same.

noration.

It may be that the parties-in the mani-nulation, if they continue their acquai-tion, may fairre in the next annual elec-tion, more than alx months away, but the control of the corporation is so tied up n estates that it would be hard to ob-

With the coup, or whatever one nay call it in Gas, the rest of the maret was uninteresting.

### Greene-Cananea.

Greene-Canamea.

Announcement was made by the management of the Greene-Canamea Copper Company that the new stock criticates of the company will be ready for distribution on and after August 1 next. 1,000 Reg tribution on and after August 1 next. 1,000 Reg tribution on and after August 1 next. 1,000 Reg tribution on and after August 1 next. 1,000 Reg tributes are exchangeable states for their shares for requested to exchange their shares for our shares for the management of the shares for the shares of the stock is to be necessary, and if the stock is to be reasonable to another a remittance should acompany excludes the shares of 20 stock, bolders will be entitled to receive one share for the shares of 20 stock, and to those whose holdings are not in multiples of five, fractional bearer scrip will be issued. This fractional bearer scrip will be desired on the "unlisted sheet" of the Boaton Stock Exchange.

It will be a great accommodation to the company and its exchange agents if holders of 20 stock, not in multiples of five, will so arrange their holdings if not exchange that it will not be necessary to such a south of the company and its exchange agents it not be received to not care to adopt this south of the company and the company and the company and the company and the schange agents it not be received to the military to the stock and the company a

ing powers and will not be entitled to dividends.

A Good Idea.

The London Standard has been discussing the means for safeguarding in corporate centerpiese, a fact which proves that in spite of the duliness of the world's markets there is still money somewhere to invest. The paper acknowledges the receipt of a draft scheme which has for its main object the protection of the interests of the investing public. It is proposed to incorporate the new association with a governing council of the protection of the interests of the investing public. It is proposed to incorporate the new association with a governing council of the interest of the investing public. It is proposed to incorporate the new association proposes, in return for a modest annual subscription, to investing headquarters in the various parts of the British Empire.

The association proposes, in return for a modest annual subscription, to investing the project submitted to it, and this would be done by the help of independent expects on the proposed parts of the capture of the proposed to the proposed to account to the proposed board of entireprise for the benefit of its subscribers. The organization will bless or bun the business or entireprise for the benefit of its subscribers. The organization would report on such points as the purchase consideration the title to the proposeries being offered for sale, the capitalization, and the succitation that is substituted the associations in will not promote in the associations, it will not promote in the associations, it will not promote in the associations in the subscribers and it will not promote in the associations in will not promote in the associations in will not promote in the associations, it will not promote in the associations in will not promote in the associa

### Rising Tendencies Checked.

Blaimy Tendeactev Checked.

The rising tendencies of prices in wednesday's market were checked at the opening yesterday by heavy sales for force through the usual subtrage channel, but the opening yesterday by heavy sales for force through the usual subtrage channel, but the opening yesterday by heavy sales for force through the usual subtrage channel, but the opening yesterday by heavy sales for force through the usual subtrage channel, but the opening were conspicuous in the list of the shares marketed.

The zelling in California Petroleum was a sulfing in California Petroleum was count in when the spectacular flotation was pulled off in this market. Recent developments indicate that the company is probably highly explailated and not well supplied with working capital. While learnings are reported as favorable, much money will be needed for development work, and this the bankers appear to be unwilling or unable to supply.

California Petroleum common lost five points and the preferred siz. Mexican Petroleum fell off four and a half, but this movement was considered to be largely sympathetic.

The undertone of the market could not be called weak. Steel held steady all day, and aside from the I per cent drop in Union Pacific, losses in the general list were mostly fractional. It was reported that Europe is buying copper metal on a larger scale than at any time for many weeks, but local manufacturers have failed to come into the market. The regular Amalizamated dividend of lig per cent quarterly was declared, but as the precent prices of metal does not show this to have been earned, the necessary money probably will be taken from the surplus of the Anaconda, a submidiary company.

# WALL STREET GOSSIP

The break in Petroleums was the rea-ture of the first hour. California Petro-leum sold off on rather heavy selling; Mexican Petroleum sold at 20, against C yesterday. Standard shares, however, were active and firm. Most of them showed gains after the opening.

Amalgamated dividend payable Augus to stock record July 25.

On the board it was thought that some loan in California Petroleum had been closed out in this stock, but Ariends of the management said that the early de-cline reflected persistent efforts on the part of the bear element to force liquida-

Iton.

It is estimated that between 20,00,000 and 25,000,000 pounds of electrolytic copper were purchased by consumers in the European market yesterday at prices ranging from 14-2 to 1-4-3-5 cents a pound, and that the lending American interests booked nearly all of the orders placed. Buying continued heavy yesterday on the other side, and the market is quoted firm at 14-5-8. So far as the domestic situation is concerned, however, yery little change is reported in the attitude of consumers.

orders have been a feature.

A conservative operator is quoted a remarking that the best feature of the market is the steady investment buying seen all through the recent period of irregularity in such stocks as Great South American L.W. refined Continent, 12.10 Northern, Northern Pacific, St. Paul, and Atchison.

The rate of discount of the Bank of Bombay was reduced from 4 to 3 per cent yesterday.

Bombay was reduced from a to a per com-yeasterday.

More or less surprise has been ex-pressed over the General Electric Com-planty's announcement ceiling for the bor-rowing of not over \$10,000,000 at the rate of \$1-1 per cent interest for eight or nine months. It is known that orders have been received for some time past by both the General Electric and Westinghouse. In June the Westinghouse did the largest husiness in its history for a single month, and thus far in July orders have been even more gratifying than in the preced-ing month. About the same condition exists with the General Electric Ac-cording to well-informed interests, there are at present no indications whatever of a slacksoing down in business received by either company.

13 10 Cotton-(Min Giles' report)-Condition Largest Morning Circ.

to yesterday's high levels. There is no news to account for this strength; on the contrary, the tenor of the news, if anything, has been rather adverse, owing to Mexican and Balkan situation. The market appears to be going up because it is soid out and there is a considerable outstanding short interest. The market seems bare of stocks: the floating supply has been reduced to a minimum. The books of the Pennsyvania, Atchison. Baltimore and Ohlo, New York Central, and other large corporations show a marked increase in the flumber of stock-holders, as do also the books of most of the lesser corporations, industrials and others. We think we note a change in the "caracter of this market. It becomes dull on reactions and active on advances, whereas for the last six months the reverse has been the case. Conditions in bond market show no improvement, however. Money on time is very scarce, at 6 firmly bid; offered in limited supply at 81-2. We note that the General Electric Company has sold Biscotton arises how are the smaller merchants, manufacturers and corporations finaning themselves?

The break in the securities of the California Petroleum Company is probably due to the fact that there has been some disappointment in the result of the company's drilling operations. The company is now drilling about twelve new wells and the unexpected developments will necessitate large expenditures with a resultant reduction in earnings. One of the California Petroleum operating men now estimates that the year's net ournings before depreciation will be approximately £1,00,000.

mately £100,000.

8. B. Chapin & Co.—London failed to give free response to our improvement yesterday, prices coming 1-5 at 13-1 lower, with Canadian Pacific showing the greatest decline. The never-ending Raikan trouble and the Mexican situation were again factors, all the continental bourness closing lower.

The market here was irregular, the leading speculative favorites holding steady while the Petroleum stocks were noti-ribly weak, this latter weakness being without explanation. The local tractiors were firm on reports of improved earnings. Transactions were well absorbed, and considering the extent of the advance yesterday the action of the side of the side of the province of the particular of the province of the prices of the prices.

Private cables attributed the reactions

Couraging to believers in higher prices.

Private cables attributed the reactionary trend in the European markets to a weakened technical position rather than to any unfavorable change in European politics or in the money situation in London and Paris. At the beginning of the week there existed in Paris and London a short interest of very large proportion, and bearish operations were compelled to cover by the more favorable aspect of Raikan affairs and the accompanying easier money. The situation is much the same here. The impulsive short covering on Tuesday and Wedneeday has weakened the technical position and left the market in a condition susceptible to attack or to natural reaction. The weak ogening here was probably due in great part to that circumstance, although the new outbreak of dissention between rail-road managers and employes was considered an important element in the weakness of Erie.

### MR. LORD PREPARES REPLY.

Answer to Charges Will Be Laid Before District Committee

Before District Committee.

Brobert G. Smith as members of the new Excise Board probably will be discussed at a meeting of the Senate District Committee at 10 o'clock this morning.

Members of the Anti-Saloon League and the W. C. T. U. and a number of clerymen will be on hand to oppose the appointnes—Mr. Lord in particular. Mr. Lord has prepared an answer to the charges brought against him, and it will be submitted before the committee.

Mr. Lord cailed at the White House yesterday and held a conversation with Secretary Tumulty. He said he felt condent that President Wilson hould not withdraw his name.

President Wilson has not yet named a successor to John B. Copoys, whose nomination as member of the board was withdrawn some time ago.

## HE'S GOING TO WORK FOR CAUSE

London, July II.—Eugene J. Boissavain, husband of Inex Milholland, the beautiful American suffragist, confided to his friends today that he had pledged himself to work for the "cause."
"My wife has convinced me that things will not be right until women are on an equal footing with men in every respect." said he. "She is very entibusiastic about votes, and I am getting that way myself. I believe that the English women are justified in using violence. Mrs. Pankhurst is the finest 'man' in England."
